Inspiration

What does the inspiration look like?

1. It looks like Ravi Mummigatti, who has not done any coding in the last 25 years - to put this into perspective, Google is 22 years old. And now he is relearning - not missing sessions, diligently completing the pre-work & daily assignments.
2. It looks like Osagie Ighodaro, who doesn't have a computer and is working on phone to complete the pre-works & assignments. At the same time, he is looking to rent a computer!
3. It looks like Jerry Ong, who is struggling to solve a problem & not giving up. He takes screenshot & sends us asking for help!
4. It looks like Debolina, who completes her daily assignments and eagerly looks forward to the next!
5. It looks like Aves Husain, who is always up for helping his fellow learners if they are stuck somewhere.

It looks like 750+ aspiring Data Scientists who are absolute beginners & putting themselves outside the comfort zone to learn a new skill!

It looks like everyone who is completing their daily learning objectives, everyone is getting stuck & not giving up, everyone who is asking for help, and everyone who is jumping to help fellow learners.

It looks like you! :)

INSPIRATION

 **Ravi Mumtigatti** 13 minutes ago
thank you for Day0-Day3.. Very helpful for non
coders like me

 **Gunnika Batra** 5 minutes ago
[@Ravi Mumtigatti](#) Good to know 😊
Keep learning!

 **Ravi Mumtigatti** 4 minutes ago
i have started coding after 25 years .. last code I
wrote was in turbo pascal during my
engineering days
