
Welcome to Data Science Online Bootcamp

Day 7

dφ

Democratizing Data Science Learning

Learning Objectives

1. Enjoying or tired of coding?

2. Let's look at the
solutions for
practice exercises

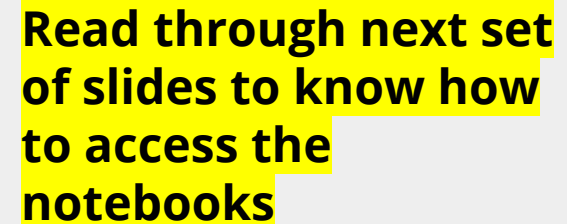

What to do next?

- Try solving the practice exercises yourself (that were given during Day 0 to Day 5)
- If you are stuck then refer the solutions given in next page

Solutions for Day#0 to Day #4

- [Practice Exercises for Day #0](#)
- [Practice Exercises for Day #1](#)
- [Practice Exercises for Day #2](#)
- [Practice Exercises for Day #3](#)
- [Practice Exercises for Day #4](#)

Read through next set of slides to know how to access the notebooks

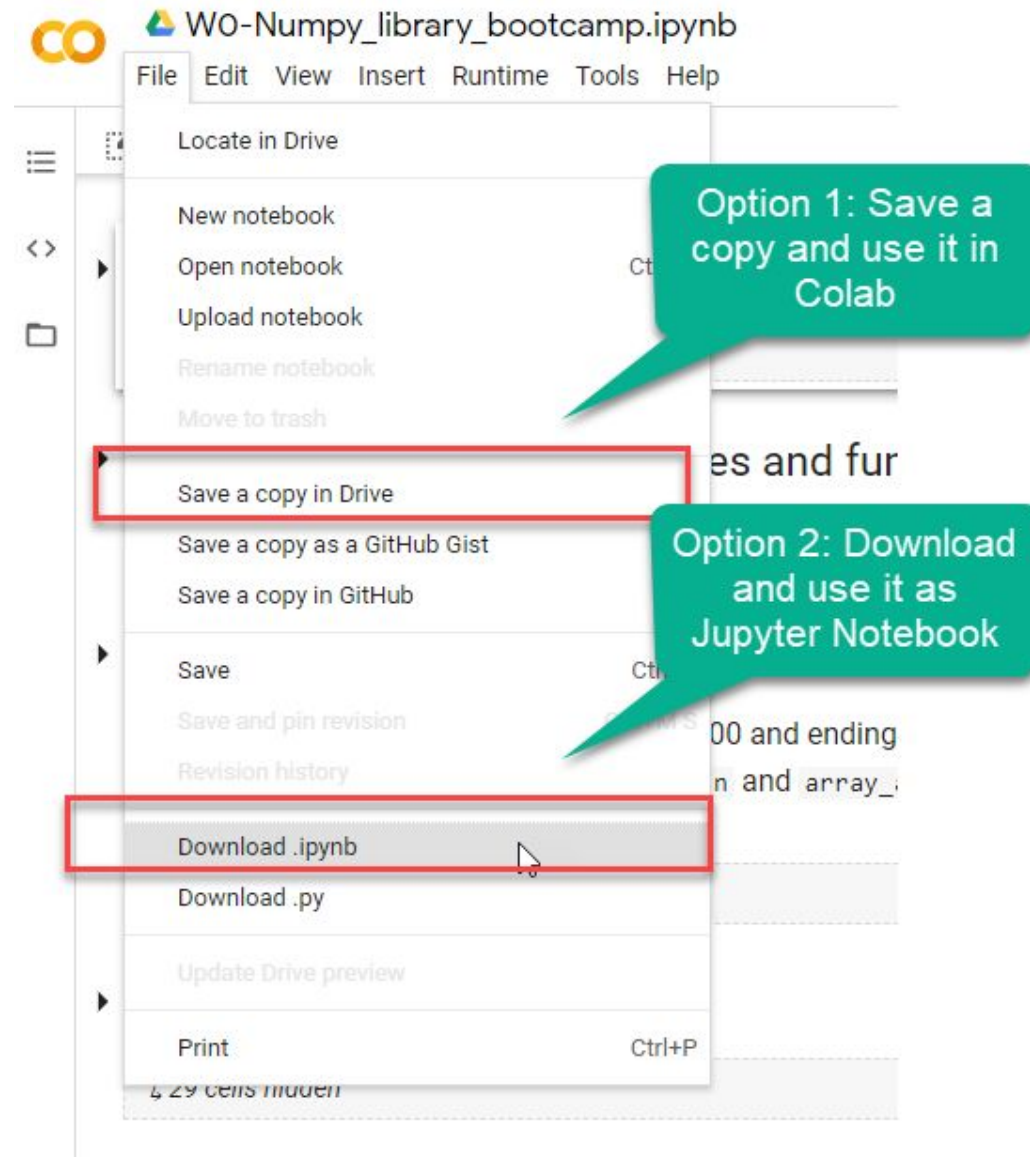

How to access Solution Notebooks?

- **Option 1:** (If you are using it in Google Colab, just go to File → click “save a copy in drive” to start working on the notebook)
- **Option 2:** If you want to use Jupyter notebook. Click “File” → “Download .ipynb file”

How to use it? (If you are logged with Gmail)

Not logged with Gmail

Some tips!

- **Things are going great and you are learning great deal?** - That's nice, just try reading up additional material and talk to your coaches and be engaged.
- **Finding things difficult?** Don't worry, we will get used all of it overtime. Drop us a message on #help channel on Slack, we will help you or you can get in touch with your personal assigned coaches.
- **Sessions are overwhelming?** - Yes, it could be. When we are doing something new there will be a friction, so please take it easy. With time things will be fine, ***our desire to learn data science should be stronger to overcome these challenges mid way!***

That's it for the day. Thank you!

Remember Google is your friend in need! And ofcourse #help channel and coaches on slack!
